

# St James' CE Primary School

## Hydrangea Class Blog

Week Ending 19th March 2021

Hydrangea Class have had a good start back at school after  
Lockdown!

In Maths, we are doing lots of recap work on Fractions, decimals and percentages. In English, we have started to look at persuasive speech writing. We are going to be writing as though we are involved in a failed space transmission and we are the last person left on Mars. To help with our learning, we have watched a film clip from the Martian. In Geography, we have been continuing our learning from Lockdown about water. We have looked at; The Water Cycle, features of a river, the different ways in which a river is used and flooding and droughts. We have linked our Geography topic in with our ICT topic by creating information slides on Pic Collage. In RE, we have been exploring Victory and what it means to be victorious. We have linked this to the Easter story. During Science, we have been learning about evolution and inheritance. We completed an experiment to find out which items acted as the best beaks to pick up food. In PE, we have been doing gymnastics.

We are thankful to God for keeping us all safe and for being with us every step of the way in our learning journey. 😊
